EXPERIENCE

Mar 2022 - Nov 2022

Disney+

Senior Front-end Developer

React, TypeScript, Jira

Built new onboarding flow for new users, adapting design to work across all geographic regions.

Translated older Disney+ code to newer styling and frameworks.

2021 - 2022

Palo Alto Networks

Senior Front-end Developer

React, Jira, Ant Design

Created new version of dashboard used inside of the company's support portal to increase performance and features.

Brought together common styling and components into new Storybook library.

2016 - 2020

PHLUR

Director, Front-end

React, GraphQL, Ruby on Rails

Developed and architected all front-end environments including website, emails, and analytics.

Moved frontend codebase from inside of rails environment to a separate repo using React and GraphQL.

2014 - 2016

Razorfish

Presentation Layer Engineer

Jade, Sass, Coffeescript, jQuery, Node

Overhauled banking system for Citibank that required people of diverse professions in many different cities around the world.

Created a single codebase so client could align custom styling and functionality with their Fortune 500 partners.

2013 - 2014

Greenling

Lead Front-end Developer

HTML 5, Sass, Coffeescript, Ruby on Rails

Responsible for a major rebrand – collaborated with designers to create a responsive, functional, and efficient user experience.

2011 - 2012

Traction

Senior Web Developer

HTML, Sass, YAML, Ruby

Coded and QA tested marketing emails for Apple, insuring that every deliverable displays correctly on all computers and browsers.
